Android Button Drawable

January 26, 2010 in Android Tutorial, Button, image by Sasikumar

In Android, by using Android button drawable we can set text position to be below, top, right or left of the button. According to the image size & view we can also set the image to any side.

Android Button Drawable Example :-

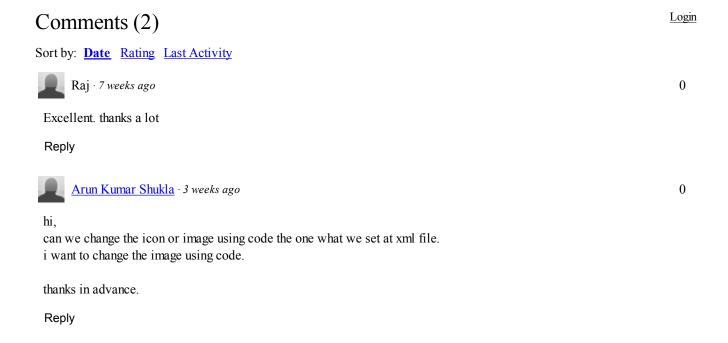

```
01 < :xml version="1.0" encoding="utf-8":>
   <LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"</pre>
02
03
    android:orientation="vertical"
    android:layout width="fill parent"
04
    android:layout height="fill parent">
05
    <Button android:id="@+id/Button01"</pre>
06
07
    android:layout width="wrap content"
    android:layout height="wrap content"
80
    android:drawableLeft="@drawable/icon"
09
    android:text="Drawable Left" />
10
    <Button android:id="@+id/Button02"</pre>
11
    android:layout width="wrap content"
12
13
    android:layout height="wrap content"
    android:drawableRight="@drawable/icon"
14
15
    android:text="Drawable Right" />
    <Button android:id="@+id/Button03"</pre>
16
    android:layout width="wrap content"
17
    android:layout height="wrap content"
18
19
    android:drawableTop="@drawable/icon"
    android:text="Drawable Top" />
20
    <Button android:id="@+id/Button04"</pre>
21
```

```
22 android:layout_width="wrap_content"
23 android:layout_height="wrap_content"
24 android:drawableBottom="@drawable/icon"
25 android:text="Drawable Bottom" />
26 </LinearLayout>
```

The output will look like
